

Front-end Angular Developer

Weissenrieder & Co. is a Swedish company and the leader in Asset Strategy analysis and Capex Management. Our solutions enable clients to optimize their Asset Strategy decisions and maximize their cash flow. We have been the lead advisor in establishing long-term asset strategies for over 600 production sites. Our clients operate worldwide and are mainly corporations within capital intensive industries. We combine extensive hands-on practical experience and theoretical insight with unique tools and processes for enabling Asset Strategy Analysis and Capex Management.

Since the start of 2004, Weissenrieder has offered consultancy services and in 2012 we developed a completely unique product, which enables customers to perform the analysis themselves. We have offices in Gothenburg, Sweden, Atlanta, USA and in Riga, Latvia.

Our business is expanding, and we are hiring an experienced Front-end Angular Developer for our office in Riga, Latvia.

Requirements

- Experience in front-end development, 4+ years
- At least 2 years of strong commercial experience with Angular 2+
- Reactive programming (RxJS)
- Understanding ES6 and Typescript
- Strong CSS expertise + CSS preprocessors
- Cross-browser developing experience
- Familiar with software design patterns using in front-end
- Experience in writing unit tests
- Familiar with Chrome Dev tools
- Desire to learn new technologies and develop as professional
- Good written and spoken English communication skills

Main responsibilities

- Develop new functionality and maintain existing one
- Write well-designed and testable code
- Architect efficient and reusable front-end components and abstractions
- Bind front-end and back-end services together
- Contribute in all phases of the development lifecycle
- Promote and drive impactful and innovative engineering solutions

Considered an advantage

- Aware of UX/UI concepts
- Functional programming experience

Our technology stack

- Angular 9, Typescript
- Java 11, Spring Boot 2.1, Maven 3
- Git, Bitbucket, Jenkins, Sonar, Nexus, Selenium, OneLogin, Jira
- AWS, Kubernetes, Terraform, Docker

We offer

- Corporate events and team building
- Health insurance
- An opportunity to travel to offices abroad
- Modern office located in Pardaugava
- Flexible work schedule
- Conferences and training
- Modern equipment, ergonomic working area, play room
